SUMMARY OF QUALIFICATIONS

Front-end developer with hands-on experience building responsive, user-centered web applications using React and Next.js. Skilled in HTML, CSS, JavaScript, and modern frameworks, with strong expertise in API integration and performance optimization. Experienced in developing scalable UI components, automating workflows, and integrating tools such as Make.com and n8n to improve efficiency. Adept at transforming design prototypes into high-performance interfaces and contributing to fast-paced, collaborative teams. Passionate about continuous learning and emerging technologies.

Core Competencies/Areas of Expertise

Front-end Development • Responsive Web Design • API Integration • UI/UX Collaboration • Version Control (Git) • Teamwork
Debugging & Optimisation • Customer Support • Technical Support • Netlify & Vercel Deployment • Communication
Automation Workflows • Airtable Interfaces • Technical Documentation • Project Management

Technical Expertise: HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Next.js & React.js, Redux, Zustand, GitHub, npm, Axios, TanStack Query, RESTful APIs, Convex Backend, Supabase, Chrome DevTools, Figma, Adobe XD, Google Apps Script, Visual Studio Code, MongoDB, Firebase, TypeScript, Notion, Microsoft Office Suite (Word, Excel, PowerPoint)

SKILLS PROFILE

Front-end Engineering:

- Developed intuitive and interactive front-end solutions using React, Next.js, and Tailwind CSS.
- Translated wireframes and UI designs into accessible and performant user interfaces.
- Integrated RESTful APIs and implemented efficient asynchronous data-fetching strategies.

Responsive Web Design:

- Ensured mobile-first development and cross-browser compatibility.
- Used Flexbox, CSS Grid, and Media Queries to achieve dynamic and adaptive layouts.

Automation & Dashboards:

- Built and automated workflow pipelines using Make.com and n8n, improving efficiency and reducing manual work.
- Automated business workflows using Google Sheets scripting and Airtable.
- Built data visualization interfaces in Airtable to track metrics and team KPIs.

Team Collaboration:

- Worked with developers, designers, and product managers to meet deadlines and deliver scalable solutions.
- Utilized Git, GitHub, and GitLab for source control and effective team collaboration.

PROFESSIONAL EXPERIENCE

MultEdge Virtual Outsourcing, Ibadan, Nigeria • Apr 2025 to Present

IT Support & Automation Specialist

- Delivered IT support, OS installations, and resolved software/hardware issues.
- Automated internal data workflows using Google Apps Script, Airtable, Make.com and n8n.
- Created interactive dashboards with Airtable Interfaces for operational visibility.
- Contributed to a Bubble.io-based full-stack tool, integrating key business processes.
- Developed a full-stack community dashboard with Next.js, integrating Supabase for backend and authentication, Stripe for payments, Resend for email sending and notifications, Discord API for automated user access upon successful payment and UptimeRobot for monitoring system uptime and downtime.

Adept Engineering Solutions, LLC, Remote (USA) • Jan 2025 – Mar 2025

Front-end Developer

- Developed scalable, user-friendly components with Next.js and Shadcn/UI.
- Collaborated with designers to implement responsive features from mockups.
- Integrated REST APIs, handled server/client-side rendering and routing.
- Maintained version control and team contributions via GitHub.

Ministry of Communications, Ilorin, Kwara State • Jan 2024 – Oct 2024

Technical Support Officer (NYSC)

- Provided technical support for ministry staff including software troubleshooting and hardware maintenance.
- Assisted in the configuration and setup of ICT equipment for internal use and public-facing services.
- Maintained documentation for IT issues and contributed to improving service workflows.
- Supported the implementation of digital tools and helped facilitate IT training sessions for staff.

Procue Brand, Ibadan, Nigeria • Jul 2023 – Nov 2023

Front-end Developer (Intern)

- Developed and maintained websites using HTML, CSS, and JavaScript.
- Enhanced performance through image optimization and lazy loading.
- Upgraded legacy codebases to meet modern standards.

Trace Media LTD, Ibadan, Nigeria • Aug 2021 – Dec 2021

Graphics & UI/UX Designer

- Produced logos, wireframes, mockups, and user flows.
- Managed multiple design projects and collaborated with developers.

PROJECT EXPERIENCE

Full-Stack Blog Platform

- Built with Next.js and MongoDB; implemented full CRUD functionality.
- Integrated server-side rendering for optimized performance.

Authentication System

- Designed secure login/signup system using Next.js and Better Auth with Convex backend.
- Utilized bcrypt.js for password encryption and protected routes via middleware

Disney & Hulu Clone

- Built with React and TypeScript; used TMDB API for content.
- Achieved 35% performance improvement with Tailwind CSS.

Firebase Chat App

- Real-time chat application with React and Firebase Firestore.
- Enabled user authentication and instant messaging.

Ecommerce Application

- Dynamic product display from API, with search and category filters.

EDUCATION AND PROFESSIONAL DEVELOPMENT

LADOKE AKINTOLA UNIVERSITY OF TECHNOLOGY, OGBOMOSO, NIGERIA • 2023

Bachelor of Technology in Computer Engineering

Class of Degree: Second Class Upper Division
